

CAS-32xx Series

## IR Illuminator

H/W Version: 1

### Ideal for low-light conditions

The CAS-32xx Series is an IR LED Illuminator that improves camera viewing distance in low-light conditions. Whether indoor or outdoor, this is a great accessory to create strong surveillance solutions in diverse environments.

### Great range, great quality

With a range of up to 15-100 meters (by model), you're able to improve a camera's performance by providing additional light.

The CAS-32xx Series has a built-in sensor that automatically turns on and off according to the amount of light that is received.

### Works well with any LevelOne surveillance camera

This product works well with any LevelOne indoor/outdoor or day/night camera that can receive infrared light. It is constructed with an aluminum casing and sunshield that is IP66 rated for tough surveillance deployments.

### Key Features

- LED provides excellent performance in the dark
- Long life of LED up to 20,000 hours
- Special metal board enhances lighting and dissipates heat
- Photo sensor delay control to avoid IR LEDs turning on/off repeatedly
- IP66-rated waterproof protection of the housing for indoor and outdoor use

### Technical Specifications

#### IR Distance

15-100M (by model)

#### IR LED

8 pcs

#### IR View Angle

15°-120° (by model)

#### IR Wavelength

850nm

#### LED Life

More than 20,000 Hours

#### Protection Class

IP66-rated waterproof

#### Power Supply

AC 85-265V

#### Power Consumption

14W

#### Temperature

-30°C ~50°C

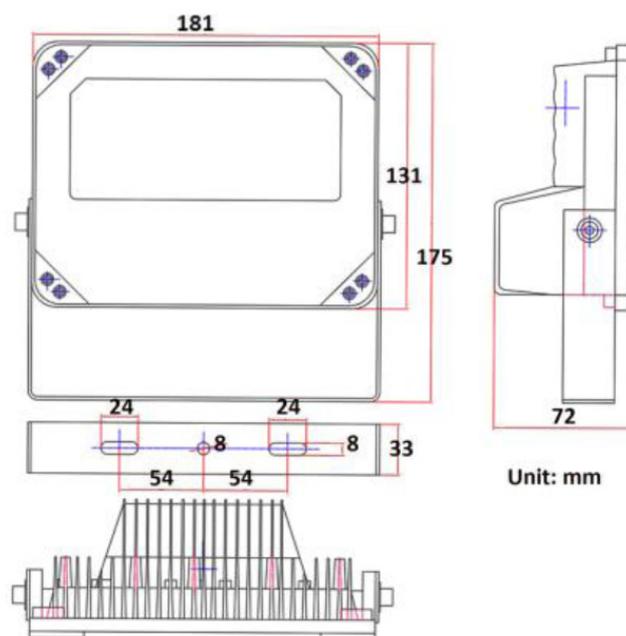

#### Weight

1.2kg

#### Dimensions

181 x 131 x 72mm
