Bluetooth Mouse

This Bluetooth optical mouse has been designed to be compact and portable with the goal of eliminating bothersome cables and maximize your working space anytime anywhere. It's one of the smartest wireless solutions using the latest Bluetooth technology with optical precision.

BLM-3000 can be used with any desktop or portable computer with a built-in Bluetooth module or an external USB Bluetooth adapter. You may navigate it cordlessly at a distance up to 10 meters (33 feet) from your PC or laptops.

A low power 800-dpi optical sensor allows you to mouse it virtually on any flat surface and in any position with high accuracy. The digital signal processor tracks your mouse moves, providing precise cursor movement and zero maintenance.

This optical mouse features a power saving switch to conserve power while traveling. There is build-in external antenna that provides superior precision and smooth navigation.
