# ❶ Hardware Installation

Note: The Level One ISDN Router incorporates a DHCP Server. If your LAN already has a DHCP Server, set DIP switch 2 ON to disable the ISDN Router's DHCP Server.
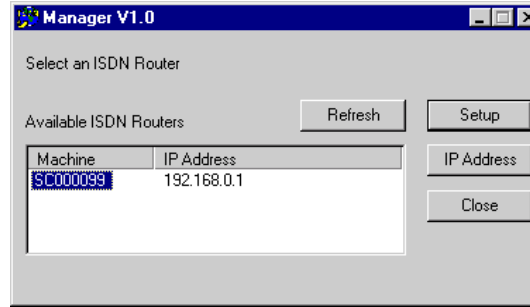

1. Use the supplied cable to connect the WAN port to the S/T connector on your ISDN Terminator.
2. Connect the LAN port to a 10/100BaseT hub.
3. Connect the supplied power supply.
❷ Software Installation

1. Insert the supplied CD-ROM. If the install program does not start automatically, run SETUP.EXE in the root directory.
2. Follow the prompts to complete the installation.
3. The setup program will now run.

❸ Setup

1. Select the Level One ISDN Router, and click "Setup".

2. If the current IP Address is OK, you will not see the following *IP Address* screen.

3. If you wish, change the suggested values. Then click "Change" to continue.

4. Enter the required data on the *Quick Setup* screen which appears next.

Internet Access (from ISP)

Account (User) Name	Account name provided by your ISP (Internet Service Provider).
Account Password	Password for the above account.
IP Address from ISP	*Dynamic* IP addresses are the most common. If *Fixed*, use the address provided by your ISP.

Idle Time-out	If a connection is idle for longer than this time period, it is terminated.
DNS IP Address	DNS IP address supplied or recommended by your ISP.
Telephone	Telephone number to connect to ISP.

### ISDN Details (from Telephone Company)

|	
Country	Select your country. For USA, select the entry to match the "Switch Type" used by your telephone company.
SPID (USA only)	SPID (Service Profile Identifier) is provided by your phone company.

5. For simple LANs, no other configuration is required. For complex situations, refer to the User Manual.

❹ PC Setup (Required on every PC)

1. Use *Start - Settings - Control Panel - Network* to locate the screen below.

2. Select the "TCP/IP -> Network card" entry, as above, and click *Properties* to see the following screen.

3. Use the appropriate settings for your situation:

• "Obtain an IP address automatically", as shown above, if using the DHCP Server feature in the *Level One ISDN Router*, or an existing DHCP Server.

• If using "Specify an IP Address", do NOT make any changes on the *IP Address* tab above.
    • On the *Gateway* tab, set the *Default Gateway Address* to the ISDN Router's *IP Address*.
    • On the *DNS Configuration* tab, enter the same value used for the *Quick Setup* screen.

4. Restart your PC.

Internet Settings

1. Run *Start Menu-Settings-Control Panel-Internet Options.*

2. On the *Connection* tab, click the *Setup* button.

3. Step through the Wizard, and ensure that Internet access to set to "via local area network (LAN)" and the other options are NOT selected.

4. Configuration is now complete. You can now use your Web Browser to access the Internet.
