

OAN-2150
WAN-2180

Enhanced Antenna for Wireless Devices

User Manual

OAN-2150

15dBi Omni-Directional Outdoor Antenna

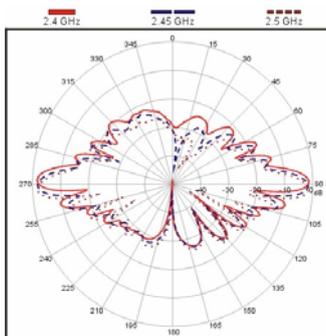

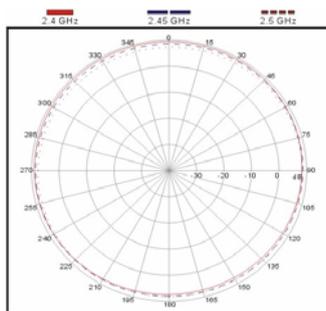

Electrical Specification

Frequency range	2400 MHz – 2500 MHz
Gain	14.5±0.5 dBi
VSWR	1.8 : 1 Max.
Polarization	Linear, vertical
HPBW / horizontal	360°
HPBW / vertical	15°
Downtilt	0°
Power handling	20 W (cw)
Impedance	50 Ω
Connector	N female

Environmental & Mechanical

Characteristics

Survival wind speed	216 km/hr
Temperature	-40°C to +80°C
Humidity	100% @ 25°C
Lightning protection	DC ground
Radome material	Fiberglass
Weight	1.8 kg
Dimensions	H1860mm * D51mm

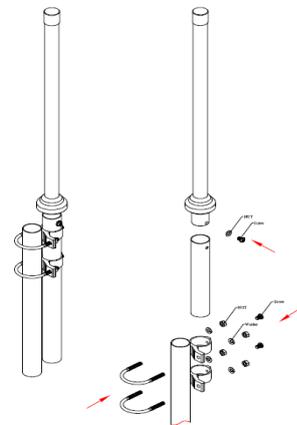

Package content:

OAN-2150
 Mounting Kit
 CLF400 3M Cable
 CLF200 1.5M Cable
 Surge Protector

Installation:

Step 1 Mount OAN-2150 on a pole or wall.

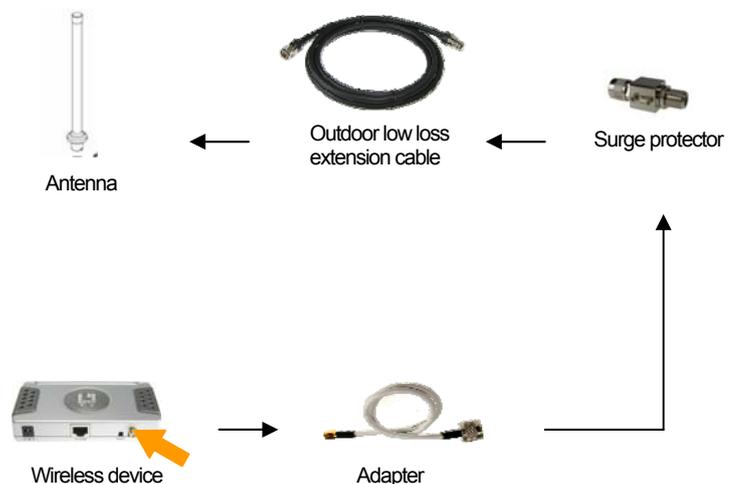

Pole Mounting

Step 2 Connect outdoor low loss extension cable (with N male connector) to OAN-2150. Water resistant of connector can be ensured with a waterproof tape. (optional)

Step 3 To protect your wireless device, attach a surge protector to the other side of the low loss extension cable.

Step 4 Connect surge protector to your wireless device. Use an adapter if the connector of surge protect is different from your wireless device RF connector.

WAN-2180

18dBi Directional Panel Outdoor Antenna

Electrical Specification

Frequency range	2400 MHz – 2500 MHz
Gain	18 dBi
VSWR	≤ 1.5.
Polarization	Linear, vertical
HPBW / horizontal	17°
HPBW / vertical	17°
Front to back ratio	20 dB
Power handling	30 W (cw)
Impedance	50 Ω
Connector	N female

Environmental & Mechanical

Characteristics

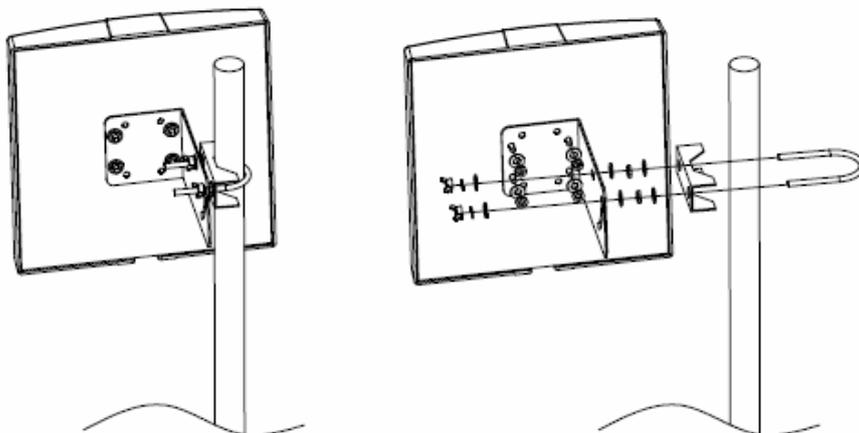

Survival wind speed	216 km/hr
Temperature	-2 0°C to +80°C
Humidity	95% @ 55°C
Lightning protection	DC ground
Radome material	ABS Grey
Weight	800g
Dimensions	365×365mm

Package content:

WAN-2180
 Mounting Kit
 CLF400 3M Cable
 CLF200 1.5M Cable
 Surge Protector

Installation:

Step 1 Screw the L type mounting base at rear of the panel antenna

Step 2 Mount the panel antenna with the pole by using U shape grip

Step 3 Connect outdoor low loss extension cable (with N male connector) to WAN-2180. Water resistant of connector can be ensured with a waterproof tape. (optional)

Step 4 To protect your wireless device, attach a surge protector to the other side of the low loss extension cable.

Step 5 Connect surge protector to your wireless device. Use an adapter if the connector of surge protect is different from your wireless device RF connector.
