Driver Installation/Upgrading/Remove

➤ **System Requirements**

- Windows Mobile 2003-Based Smartphone with built-in Bluetooth.
- At least 60 KB of free memory on your Smartphone.
- A computer with the Microsoft Windows 2000/XP operating system.
- A synchronizing program on your computer, such as Microsoft ActiveSync 3.6 or higher, for copying files to your Smartphone.

➤ **Before to Use**

- Check the batteries status of Bluetooth keyboard.
(Open the switch to check the green light on the keyboard.)
- Disable other previously installed keyboard application which will use Bluetooth on your Smartphone.

➤ **How to Install / Upgrade / Remove the Bluetooth keyboard Driver?**

■ **Installation**

- * Connect your Microsoft Smartphone through infrared/cable for ActiveSync with the computer.
- * Insert LevelOne BLK-2000 CD into computer's CD-ROM drive.
- * Follow the instruction on screen to complete the installation.
- * After the Bluetooth keyboard driver is installed successfully and the Microsoft Smartphone is reset, you can find this Bluetooth keyboard icon is showed on the Home Menu of the mobile device. (Figure 1)

■ **Upgrading**

Please check the Agent's website from time to time to check if any new driver is released.

(**Note:** Please remove the old driver out first, and then install the last one into your device.)

■ **Removing**

Figure 1

Step 1 : Turn the driver off

Step 2 : Tap Start -> Settings -> Remove Programs, (Figure 2) choose the “**Bluetooth BTKeybd**” and click the **Yes** button. (Figure 3)

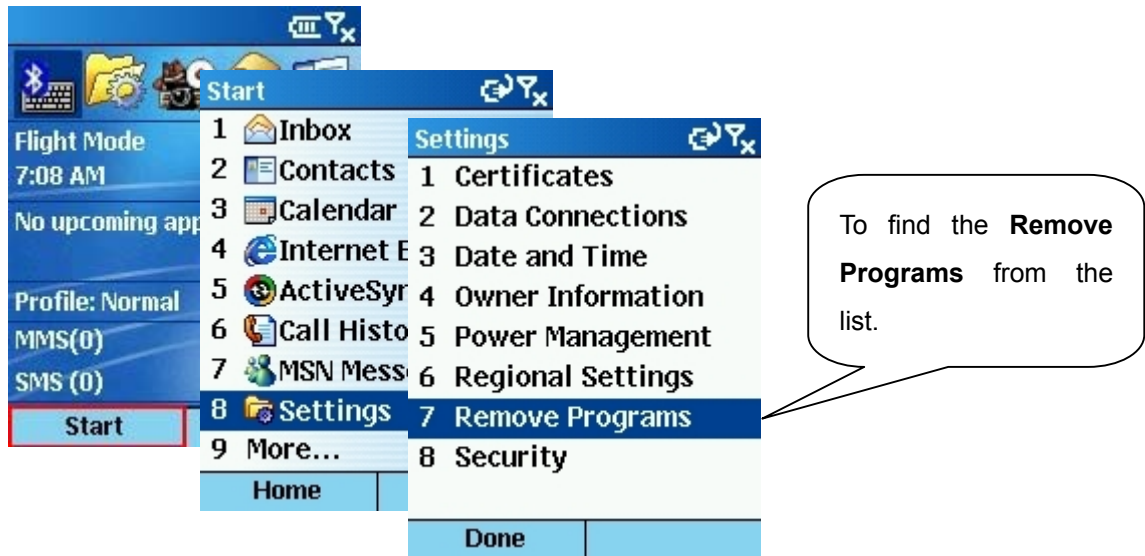

Figure 2

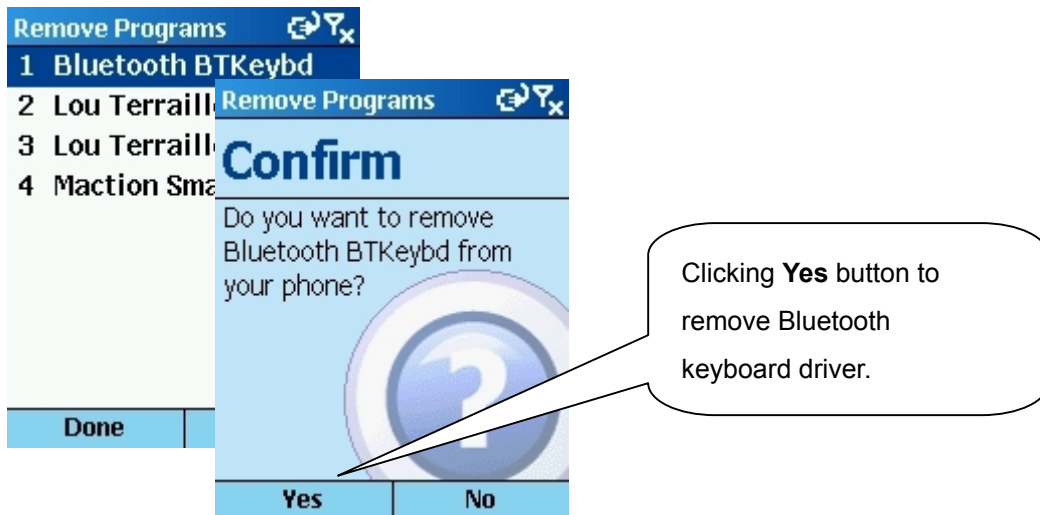

Figure 3

➤ Active Keyboard

■ How to connect the Bluetooth keyboard with your device??

Step 1:

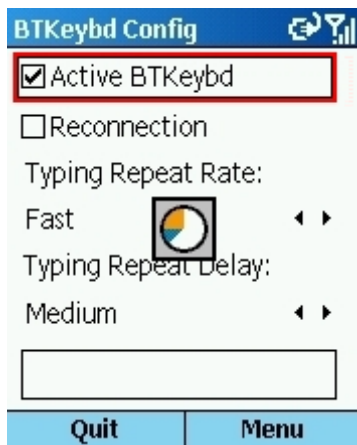

Turn the Bluetooth keyboard on, the LED will flash orange for 1 second, then turn to flash green once every other second, the Bluetooth keyboard is in Discovery mode.

Step 2:

Click “BTkeybd” icon in Home Menu of the Smartphone. (Figure 5)

Figure 5

Step3:

Click “Active Keyboard”.

Smartphone will search and connect the Bluetooth Keyboard automatically (Figure 6)

Figure 6

Figure 7

➤ Reconnection

After the connection established successfully, then you can turn “Reconnection” to “On”. This function allows the Bluetooth keyboard memorizes the last connected device, and they will pair automatically in next connection without further search. (Figure 7)

Note: Please do not turn “Reconnection” on before the first connection established

➤ **Typing Repeat Rate**

This option allows you to set the speed at which a letter, number or other character repeats when you press and hold a key. Use your stylus to drag the marker arrow toward **Fast** (to increase) or **Slow** (to decrease) the repeat rate. (Figure 8)

Figure 8

Figure 9

➤ **Typing Repeat Delay**

This option allows you to set the length of time before a letter, number or other character begins to repeat when you press and hold a key. Use your stylus to drag the marker arrow toward **Long** (to increase) or **Short** (to decrease) the length of the delay. (Figure 9)

➤ **Keyboard Test**

Test the repeat rate and delay by holding down a letter or number key on the Bluetooth keyboard. The character appears according to the setting you have chosen. Change and test these settings until you achieve the desired outcome. (Figure 10)

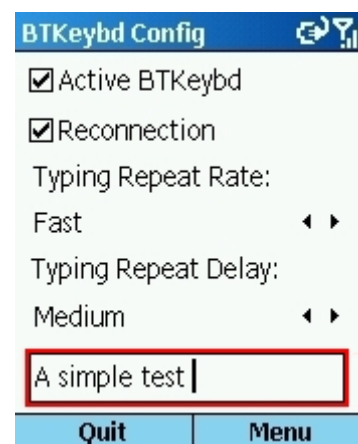

Figure 10

The Illustration of “ Function ” Page

Item	Min	Max	Unit	Note
Operation Temperature	-10	50	℃	Humidity Condition = 5 ~ 90%RH
Storage Environmental	-30	70	℃	Humidity Condition = 5 ~ 90%RH

Appendix A : Troubleshooting

1. How do I verify my Smartphone Operation System version?

- Tap “Start → Settings → About”.
- You can see Smartphone OS software version here.

2. I am not able to install Bluetooth keyboard driver to my Smartphone?

- Please ensure the connection cable is connected between computer and Smartphone.
- Please check Microsoft “ActiveSync” software is right down on your system tray.
- Click “Start → ActiveSync” on your Smartphone”
- To synchronize Smartphone and computer to ensure connection is fine. (If you did fail to connect with your computer, please check the connection between Smartphone and PC first.)
- Follow Bluetooth keyboard user guide to repeat installation.

3. Why Smartphone has no response when I type on Bluetooth keyboard?

- Make sure the keyboard is in the connected status by LED flash time.
- Check the battery of mobile device is charged.
- Check the batteries of Bluetooth keyboard have enough power by LED color.

4. Why couldn't I remove the Bluetooth keyboard driver from my device?

- Please check if the Bluetooth keyboard still in the link mode or not. If the keyboard still connected with your device, please close the application from your device and try again.
